What is Traffic Calming?

- Traffic calming measures are intended to reduce vehicular speeding on local residential roads without restricting access

Traffic Calming Goals

- To increase the quality of life
- To incorporate the preferences and requirements of the residents
- To create safe and attractive streets
- To help to reduce the negative effects of motor vehicles on the environment (i.e., pollution, sprawl)
- To promote pedestrian, bicyclist use and transit

Step 8

Implementation

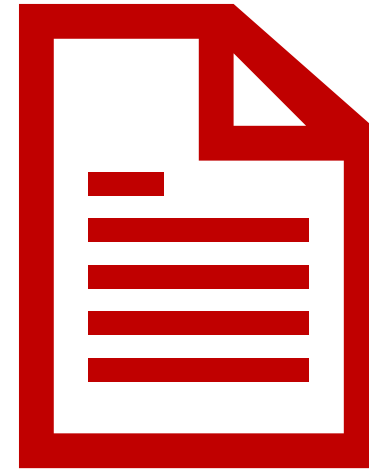

Step 1: Initial Contact & Review

- Local community members contact Loudoun County regarding the specific traffic calming concerns
- Eligibility requirements:
 - o must be VDOT owned and maintained road
 - o must be a *neighborhood street* where residents connect to roadway via driveways
 - o must have a posted speed limit of 25 MPH or less

Step 2: Traffic Calming Study Request

- An official letter from the Homeowners Association (HOA), Civic Association, or Community Task Force requesting a traffic calming study is submitted to the Loudoun County Department of Transportation and Capital Infrastructure (DTCI)

Step 3: Engineering Study

- DTICl evaluates the vehicle traffic data to determine if the roadway qualifies for traffic calming measures:
 - ✓ Traffic volumes between 600 and 4,000 vehicles per day
 - ✓ 85th percentile observed speed must be 10 MPH or more than the posted speed limit

Street Name	ADT	85 th Percentile	Traffic Calming
Any Street	600	*35 MPH	Yes

*Assume Posted Speed Limit of 25 MPH

Step 4: Conceptual Plan Development

- DTCI develops a conceptual traffic calming plan in coordination with VDOT and County Stakeholders:
 - o Loudoun County Sheriff's Office (LCSO)
 - o Department of Fire, Rescue and Emergency Management (DFREM)
 - o Department of General Services (DGS)
 - o Loudoun County Public Schools (LCPS)
 - o Homeowners Association (HOA), Civic Association, or Community Task Force

Concept

Step 5: Community Support/Approval

- DTCl presents the conceptual traffic calming plan to the community
- DTCl with support from Homeowners Association (HOA), the Civic Association, or the Community Task Force must collect resident input via ballot survey
 - o More than 50% of the occupied residences in the survey area must support the plan
 - o Each residence address is allowed a single signature or vote to indicate agreement or disagreement. Individuals must be 18 years or older to provide a signature

Prior to the community meeting, DTCl and VDOT assess the location where speeding occurs and decide on a survey area.

The HOA, Civic Association, or Community Task Force will secure agreement from any affected property owners of a residence where the location of the proposed traffic calming measure (excluding warning signs) is positioned.

Step 6: Plan Development

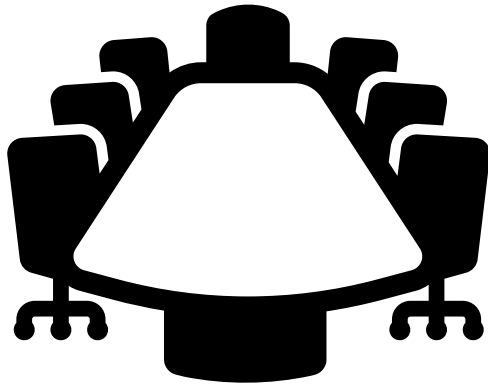

- DTCI will obtain cost estimates for engineering design, implementation, and construction for the traffic calming measures
- DTCI will prepare a Board item for the proposed improvements and community support

FINAL

Step 7: County Board of Supervisors

DTCI presents the recommended plan and funding source to the Board of Supervisors (BOS).

Step 8: Implementation

- DTCI coordinates Installation.
- VDOT Inspects.

Possible Traffic Calming Measure

- Additional \$200 Fine Signs
- Watch for Children Signs
- Speed Hump
- Pole Mounted Speed Display
- More....

Watch For Children Sign

- Posted speed limit is 35 mph or less
- At the major approach(s) to a residential development
- At major entry points of a subdivision
- Not within a subdivision.

Speed Hump

Advantages

- Low cost (Approx. 3K)
- Easily recognizable
- Effective in reducing speeds

Disadvantages

- Increased noise to nearby residents
- Impediment to bicyclists
- May slow emergency vehicles
- May be damaged by snowplows

Pole Mounted Speed Display

Description

Regulatory speed limit sign alongside a radar speed feedback sign that shows drivers' vehicle speeds upon approach.

Advantages

- Easily recognizable
- Does not slow emergency vehicles and transit
- Collects Traffic data

Disadvantages

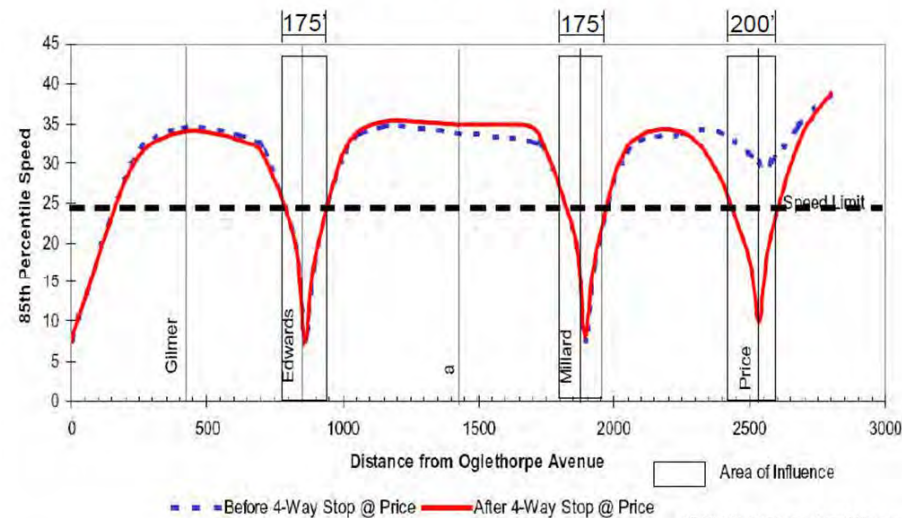

- Requires power source (Solar)
- No physical deterrent to slow vehicles
- Subject to vandalism
- 5-10 years life expectancy

Stop Signs

Note: Stop signs are no longer permissible by the Federal Highway Administration for use as traffic calming devices.
